Ali Muneer

Full Stack Developer (MERN)
Lahore, Pakistan | +92-312-0546646 | alimuneer001@gmail.com | GitHub | LinkedIn

Full Stack Developer with hands-on experience across the MERN stack, gained through an internship and a full-time role at Cinnova Technologies. Skilled in building responsive user interfaces with React.js and developing backend services with Node.js and Express.js. Comfortable working across the stack, from database design in MongoDB and MySQL to integrating APIs and collaborating with cross-functional teams. Eager to keep growing as a developer and contribute to impactful, user-focused products.

SKILLS

- Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript
- Frontend: React.js, Next.js, Tailwind CSS
- Backend: Node.js, Express.js, Python (Django, FastAPI), NestJS
- Databases: MongoDB, PostgreSQL, MySQL
- APIs: RESTful APIs, GraphQL, WebSockets
- AI Tools/IDEs: Antigravity, Codex, Claude, Cursor

EXPERIENCE

Full Stack Developer Spadasoft *June 2026 – Present*

- Developing and maintaining full-stack web applications using the MERN stack.
- Building responsive, user-friendly interfaces and integrating them with backend services and APIs.
- Collaborating with cross-functional teams to deliver scalable, maintainable features.

Full Stack Developer Cinnova Technologies *Aug 2025 – May 2026*

- Developed and maintained web applications, handling both frontend and backend development.
- Built responsive, accessible user interfaces using React.js, improving usability across devices.
- Implemented server-side functionality and integrated application components with backend services.
- Optimized frontend performance to speed up page load times and reduce bounce rates.
- Collaborated with backend engineers to integrate APIs, ensuring reliable data flow and consistent application behavior.
- Implemented automated testing workflows that improved code quality and reduced production defects.

Full Stack Intern Cinnova Technologies *May 2025 – Jul 2025*

- Worked across frontend and backend development, contributing to live client projects.
- Assisted in building and refining UI components to align with design specifications.
- Gained hands-on experience with the MERN stack in a professional development environment.

EDUCATION

BS Computer Science — The University of Lahore *(Jan 2019 – Dec 2023)*
FSc Pre-Engineering — Punjab Group of College, Okara *(Jan 2016 – Dec 2018)*

PROJECTS

BlinkHint — AI-powered Chrome extension that gives real-time conversation cues during remote interviews, using speech-to-text and LLM pipelines to generate low-latency talking points in a lightweight overlay.

ShopSphere — Gaming gear e-commerce platform with category browsing (consoles, games, peripherals, hardware), product pages, cart, and login/checkout flow.

Meridan — Medical laboratory website focused on appointment scheduling and test result integration, built to streamline communication between labs and patients with an easy-to-use booking flow.

3D Advertisement Truck — Interactive 3D truck advertisement display project for marketing campaigns, showcasing dynamic visuals and animations to help brands present products on the move.

Travel Addict — Travel agency site enabling travel package listings, booking, and itinerary management, featuring destination pages with pricing, user authentication (login/sign-up), and a contact system.
